Dear Strong bad,

Please come back to the internet full time, we miss you.

Your friend with benifits,
Miss galaxy

I enjoyed all of these episodes, 1st was the best but the others had there moments.. 8-bit is enough.....where do i start with this episode? i've NEVER seen a game pull of MOST genres for ONE character in a single short episode. this game has been a joy to play ever since the begining, from the dialogue to puzzles. this episode in particular is the best damn telltale game episode i've ever played. the plot was fantastic and took homestar runner to new heights. how the characters are implimented in the games is very creative like strong sad as a.....wizard? although i couldnt complete it due a certain collectible. i love this game and hope telltale make a season two. that would make my day!

9V10. If you did not like sam & max, you won't like this either.
